# Brattice Specialty Fabric

Brattice J® 175 is a polypropylene scrim reinforced fabric with anti-static grid and fire-retardant coating specifically designed for underground mines. Brattice J® 175 is perfectly suited for use as curtains, wall hangings and coverings, and ventilation ducting within the mining industry.

Utilising a UV-stabilized base scrim with a non-UV stabilised coating and finish on both sides, Brattice J® 175 is lightweight and is available in various widths and optimal roll lengths so it's easy to handle. Brattice J® 175 is FRAS-certified and complies with MDG3608, including Fire Resistance, Electrical Resistance, Air Permeability and Limited Oxygen Index.

Brattice J® 175 is coated in GALE Pacific's Australian factory using our proprietary coating process.

- More than 40 years experience with an exemplary, proven safety record
- Permanent anti-static performance in rolls and across joins, providing confidence in application safety
- Smooth surface enhances ventilation performance and reduces injury risk in installation and storage
- High strength and light weight design makes manual handling easier and reduces the risk of injury during installation and storage
- Sewn joins resulting in high strength and maintenance of conductivity

#### **Properties**

Nominal fabric mass	175gsm
Nominal thickness	0.15mm
Roll width (m)	1.83 / 3.05 / 3.66 / 4.00 & 4.57
Roll length (m) ^MTO option	25^ / 50

#### Performance

Tensile strength - warp	1220N / 50mm
Elongation at break - warp	18.5%
Tensile strength - weft	866N / 50mm
Elongation at break - weft	12.0%
Wing tear - warp (mean)	326N
Wing tear - weft (mean)	212N
Hydrostatic pressure (mean)	>250kPa

### **Applications**

Coal Mining:

- Curtains
- Wall hangings
- Ventilation ducts
- Sheeting
