

Canvacon®

Polyfabric

Canvacon® is a premium quality woven polyethylene-based polyfabric designed for a wide range of industrial and agricultural liners, covers and temporary shelters.

A high-performance, heavy duty fabric made from premium UV-stabilised materials and coated in our Australian operation using GALE Pacific's proprietary coating process.

Canvacon® provides excellent strength to weight performance, high abrasion and tear resistance. It features excellent welding characteristics to ensure strong watertight seams and a durable, long lasting barrier against moisture.

It is available in various grades, standard and colours.

Features	Benefits
UV-stabilised coating and UV-stabilised basecloth	Long service life
3 year UV Warranty and 3 Year Delamination Warranty on the fabric	Confidence in product performance
High levels of coating adhesion	Improved weld strength and ease of welding
Class leading flex resistance	Greater confidence in product performance
Class leading abrasion resistance	Versatility in use
Dirt repellent PE coating	Good appearance, reduced maintenance processing and costs
Excellent lay-flat characteristics	Ease of fabrication and handling
Fire Retardant – 3000 variant only	Improved safety
100% Recyclable	Environmentally friendly disposal

Applications

- Dome shelters
- Temporary shelters
- Water storage liners
- Waterproof membranes
- Dam liners
- Pond liners
- Shelter and structural covers
- Hay stack covers
- Agricultural covers
- Static covers
- Poultry external and internal curtains
- Pig shelters

Usage Instructions

CANVACON® 3000FR

- **Caution - Not for outdoor use**
- Do not use against flames – fabric is flame retardant, not flame proof
- Suitable for hot air and hot wedge welding.
- Not suitable for high frequency welding
- Contact with organic solvents, halogens or highly acidic substances may reduce the service life of the fabric and void the warranty
- Not suitable for applications where excessive flexing or 'wind flap' is present

CANVACON® 5000E, 5000Q, 7000E, 7000Q

- Suitable for hot air and hot wedge welding
- Not suitable for high frequency welding
- Do not use against flames
- Contact with organic solvents, halogens or highly acidic substances may reduce the service life of the fabric and void the warranty
- Not suitable for applications where excessive flexing or 'wind flap' is present

GALE Pacific manufactures a wide range of high quality polyfabrics designed specifically for Agricultural, Building, Construction and Aquaculture applications.

Each range has a number of market leading features and many are considered benchmarks in the Australian marketplace with many years of proven performance.
